

PRODUCT DESIGNERS

WHERE ART MEETS TECHNOLOGY & DESIGN

Design a process that includes consumer research into how people use the technology
Opt for a creative streak so that the finished product is aesthetically pleasing to the end user
Create digital software that entices the user into a seamless interaction between human & computer
Make something both look good & function in a browser/device at the same time
Produce visual designs in Photoshop & then turn them in to HTML code that deals with the wonders of browser compatibilities
Implement a design for the web that renders correctly & get all those pesky pixels to line up perfectly

Prior UI interface development experience
Proficient in HTML5, CSS3, jQUERY, Javascript
Demonstrable graphic design skills with a strong portfolio
Accuracy & attention to detail
